- Manually Picked DVDs and CDs using a scanner gun with Windows operating system.
- Replenishment duties.

About me:

I work full-time and study at university(two modules left, and one of them is a dissertation), but I still have some free time. I invest most of it working on expanding my knowledge outside of university scope. However, I want to start a career in computing. At the moment, I am learning React that I could

create cross-platform applications. Also, I do love performance cars, weird history, playing computer games and dungeons and dragons with my friends.
